EDUCATION

New York University

New York, NY

Bachelor of Arts/Science in Computer Science

Expected May 2026

Relevant Coursework: Data Structures, Algorithms, Web Design, Operating Systems

SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript

Tools: React, Node.js, Angular, Excel, Tableau, Power BI, Pandas, NumPy, MySQL, PostgreSQL, Git, Docker, Linux, REST APIs, AI Agents, LLM Pipelines, Prompt Engineering, Scikit-learn, Cloud (AWS)

EXPERIENCE

App Forge Solutions

Westfield, MA

Product & UI/UX Intern

September 2025 - Present

- Developed scalable front-end components and a reusable Figma-to-code library, reducing design-to-development revisions by 30%
- Translated CTO requirements into technical UI specifications, improving accessibility and reducing rework by 20%
- Designed navigation and information architecture for a TimeTracker app, improving task efficiency by 35%
- Analyzed UX performance metrics to identify trends and friction points, improving system usability by 20%

Grey Matterz Inc.

Edison, NJ

AI Product Analyst Intern

September 2024 - August 2025

- Processed and analyzed 5M+ records using Python (Pandas, NumPy) to uncover behavioral and product insights
- Designed and tested AI agents using LLMs and prompt engineering, improving task efficiency by ~30%
- Built Tableau dashboards to track KPIs such as product adoption and latency, focusing on clear data visualization and communicating insights effectively to stakeholders
- Designed A/B experiments using SQL and Adobe Analytics, uncovering trends and driving 10–15% performance improvements

Source Soft Solutions

Edison, NJ

Software & Data Systems Consultant

September 2022 – August 2024

- Developed 6+ scalable web applications using React, Angular, and Node.js, integrating and consuming REST APIs and improving system reliability by 20%
- Built and optimized backend systems using Spring Boot and MySQL, reducing development delays by ~25%
- Owned full application lifecycle for production-grade systems, collaborating cross-functionally to resolve 30+ defects and improve performance by ~15%
- Conducted data analysis using SQL and logging tools to identify trends and bottlenecks, improving system efficiency by ~20%

PROJECTS

Bias Brain Website | React, Node.js, MongoDB

- Built a full-stack AI-driven web application analyzing cognitive biases and behavioral data
- Designed backend APIs and data flows to support dynamic, insight-driven outputs

Expense Tracker (Team Project) | React, Express, MongoDB

- Built expense tracking features including categorization, filtering, and UI enhancements
- Collaborated in an Agile team using GitHub and pull requests to deliver features across sprint cycles
